TS-100 Drilling Machine

The most versatile light weight and compact hydraulic feed drilling machine with improved advantages

With wide applications such as test boring, shallow mineral exploration from surface and underground, grout holes, soil sampling and site investigation

Model TS-100 Drilling Machine

FEATURES

- Its compactness and light weight enable easier installation and mobilization.
- Optional hydraulic chuck does away the tediousness and dangers of manual chucking and yet it makes easier to operate and save time for further drilling per shift.
- Rugged mechanism assures long trouble-free operation.
